Garbage Truck Tracker App

PART I. Consent Form

You are invited to participate in a research study evaluating the usability of a newly developed system. This study is designed to evaluate the functional performance and user experience of our newly developed system, Garbage Truck Tracker App**.** You are invited to participate because your background and experience make you an ideal representative of our target user group. The study aims to understand how users interact with the system and to determine if it effectively meets its intended goals. Specifically, we are evaluating the system's ease of use, interface design, and overall efficiency in executing core tasks. If you agree to participate, you will be asked to navigate the system to complete specific scenarios, followed by a survey to document your feedback. The entire session is expected to take approximately 10 to 15 minutes. Your involvement is entirely voluntary; you may choose to skip any questions or withdraw from the study at any time without penalty. All data collected will be kept strictly confidential, as your responses will be anonymized, stored securely, and used solely for academic research purposes. There are no foreseeable physical or psychological risks associated with this study beyond those encountered in daily computer use. While there may be no direct personal benefit to you, your insights will provide invaluable data to the Computational Sciences Department, contributing to the development of more efficient and user-friendly technology.

MICHAEL B. AMATA
Course Instructor, Computational Sciences Department

Consent Statement: *By signing below, I acknowledge that I have read and understood the information provided above, have had my questions answered, and voluntarily agree to participate in this study.*

Name: ______________________________ ***Signature of Participant:*** _____________ ***Date:*** _________

Lead Researcher Contact Information Name: *John Carlo J. Pasa*

Email: *jcpasa922.pbox@parsu.edu.ph*

PART II. Demographic Profile

Please provide the following information to help us categorize our findings:

Age: __________

Gender: [ ] Male [ ] Female [ ] Non-binary/Other [ ] Prefer not to say

Course/Program: __________________________

Year Level: __________________________

Experience with similar systems [ ] Yes [ ] No

Frequency of technology use [ ] Daily [ ] Weekly [ ] Monthly [ ] Rarely/Never

PART III. SYSTEM USABILITY SCALE (SUS)

The System Usability Scale (SUS) is a reliable tool for measuring the "usability" of a product. It consists of a 10-item questionnaire with five response options for respondents, ranging from Strongly Disagree to Strongly Agree.

For each of the following statements, please check the box that best describes your reaction to the system today. It is important to mark every item. If you feel you cannot respond to a particular item, please mark the center "Neutral" box.

SUS Questionnaire:

Statement	Strongly Disagree (1)	(2)	(3)	(4)	Strongly Agree (5)
1. I think that I would like to use this system frequently.					

2. I found the system unnecessarily complex.					
3. I thought the system was easy to use.					
4. I think that I would need the support of a technical person to be able to use this system.					
5. I found the various functions in this system were well integrated.					
6. I thought there was too much inconsistency in this system.					
7. I would imagine that most people would learn to use this system very quickly.					
8. I found the system very cumbersome to use.					
9. I felt very confident using the system.					
10. I needed to learn a lot of things before I could get going with this system.					

PART IV. OPEN-ENDED QUESTIONS

1. What did you like about the system?

2. What improvements can you suggest?

Thank you for your time and valuable feedback!
